

Katelyn Mehner

Full-Stack Software Engineer

(805) 300-7248 | kmehner@gmail.com | [LinkedIn](#) | <https://www.katelynmehner.com/> | San Diego, CA

Full-stack software engineer, startup co-founder, and coding instructor focusing on building products at the intersection of commerce and community.

AREAS OF EXPERTISE

Programming languages: Swift, Python, Javascript, Typescript, Git, CSS, HTML, SQL

Web tech and frameworks: SwiftUI, Django, React Native, ReactJS, REST API, GraphQL, JSON, Postman

Databases and tools: Xcode, GitHub, VSCode, PostgreSQL, Docker, Render.com, AWS, DataGrip, GitKraken, Figma

EXPERIENCE

CTO and Co-Founder

Cue the Curves | Remote

06/2022 - Present

- Led the development, launch, and maintenance of a mobile application of a community shopping platform from the initial no-code prototype to an iOS app.
- Implemented a scalable technical architecture for the platform's social and shopping elements using frameworks such as Django and XCode.
- Gained international recognition for the platform and scaled our app user base to over 5,000 women.
- Designed UI/UX from wireframes through final designs for optimal usability.
- Spearheaded the launch of user-to-user interaction features in-app, including user posting, commenting, and reacting to enhance the community experience.
- Led implementation and management of SDKs (such as Posthog and Airship) to enhance user experience and assist in data acquisition.
- The managed development team and guided team members in learning new software and frameworks.
- Facilitated customer feedback sessions to develop product roadmap and constantly improve features.

Lead Instructor

Coding Temple | Remote

07/2024 - Present

- Teach cohorts of 10 students frontend core development, including but not limited to HTML, CSS, CSS frameworks, javascript, python, and react.js.
- Demonstrate and educate students on development best practices: debugging, documentation, testing, etc..
- Provided mentorship and technical guidance to junior developers, contributing to their professional growth and ability to transition into professional roles within leading tech companies.
- Support students 1:1 via grading assignments, feedback, and tutoring.

EDUCATION

Coding Temple | Full Stack Development Certification

- Nationally recognized coding boot camp that has placed students at top companies.
- Trained in key programming languages, frameworks, and tools such as JavaScript, Python, Flask, React, databases, server-side programming, and deployment.

University of Colorado | Bachelor's of Arts and Sciences in Economics

- Graduated with a 3.8 GPA.
- Minors in Spanish and Business.
